

Each BaseRun is in one piece - 2 1/2" from the back edge all the way around the house to 2 1/2" from the other back edge.

Folded corners around the door (no eyelets in folded corners!).
Or... a "T" connection next to the door gives a robust service for a ceiling light in the main room.

The first fold is away from the new direction.

The second fold is toward the new direction.
